

## Roving Computer Training

**Prime Solutions** Training & Consulting offers a roving service to clients seeking targeted and individual programs to meet staff training objectives.

These flexible, one-on-one sessions are very cost-effective because they are short, geared to each participant's specific needs, and can cover multiple applications.

### BENEFITS

**Prime Solutions'** tailored training offers many benefits for an organisation including:

- Minimising staff absence from the workplace to attend training
- Maximising productivity and in turn providing tangible business outcomes
- Reducing reliance on IT Dept or Help Desk for support by using participant's own files for one-on-one training
- Increasing employee efficiency as knowledge transfer is generally immediate and relevant

Documentation is provided following the training to detail who has participated and what has been covered.

Reference materials can also be supplied to support topics covered in the sessions.

For further information, please contact Donna Hanson at **Prime Solutions** Training & Consulting on 0412 073 316 or email [enquiries@primesolutions.net.au](mailto:enquiries@primesolutions.net.au) for a quote.
